PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science graduate with hands-on experience in Artificial Intelligence and Machine Learning. Skilled in designing, developing, and deploying AI-driven solutions using modern tools and frameworks. Completed an AI internship at Systems Limited, gaining practical exposure to real-world AI workflows, model deployment, and cross-functional collaboration. Passionate about harnessing data-driven insights and intelligent systems to solve complex problems and drive innovative technology solutions.

EXPERIENCE

AI Intern

Jun '25 — Aug '25

Systems Limited

Karachi

- Contributed to the development and experimentation of open-source Large Language Model (LLM) tools.
- Assisted in building AI-driven business automation solutions, improving efficiency and reducing manual processes.
- Worked on Natural Language Processing (NLP) projects involving text classification and summarization.
- Supported the deployment of AI models into production environments using APIs and Streamlit dashboards, ensuring smooth integration and user accessibility.
- Collaborated with senior data scientists and AI engineers, strengthening teamwork, communication, and project management skills.

EDUCATION

BS in Computer Science, Salim Habib University

Sep '22 — Jun '26

Karachi

SKILLS

Languages & Scripting Python, C++, SQL, JavaScript

Web & Frameworks React.js, Next.js, Prisma ORM, TailwindCSS, Git, Vercel

AI/ML & Data Libs Hugging Face, Llama.cpp, SQLCoder, Scikit-learn, Pandas

Databases & Cloud MySQL, PostgreSQL, AWS (Basic), Make.com

Core Skills UI, Backend logic, Form processing

Languages English

PROJECTS

Text-to-SQL App (LLM-powered)

- Built a natural language interface for querying SQL databases using local LLMs (SQLCoder, Ollama) and Streamlit.
- Enabled users to generate and execute accurate SQL queries from plain text inputs.
- Tech Stack: Python, Hugging Face, Streamlit

AI Tour Booking App

- Developed a scalable travel assistant that uses an AI agent to find the cheapest flights and hotels.
- Integrated Next.js, Prisma, PostgreSQL, and Make.com for real-time data automation.
- Designed a clean, responsive UI using ShadCN.

Sales Forecast (Daraz Dataset)

- Trained a regression model to predict product sales, reducing RMSE by 23% through hyperparameter tuning and feature engineering.
- Conducted extensive data preprocessing and feature selection to improve accuracy.
- Tools: Python, scikit-learn, pandas

Custom Grafana-Based Monitoring and Control Console | Final Year Project, (collaboration with

SUPARCO Pakistan) [Link](#)

Sep '25 — May '26

- Built a real-time industrial monitoring dashboard using Next.js, React, ASP.NET Core (.NET 8), Grafana, and InfluxDB.
- Developed a Digital Twin simulator for real-time PLC data monitoring and visualization.
- Implemented JWT authentication, role-based access control, and automated email alerts.
- Integrated Modbus TCP, Docker, and InfluxDB for scalable, low-latency telemetry processing.
